Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 is not understood. The ground-side surfaces are not facing each other (see Fig. 1). The opposite surfaces are the one who are facing each other at the lower end region (see Fig. 1) held by the adapter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-11, 13, 15, 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Christensen US Patent 5,944,760.

Christensen discloses a prosthetic foot having two concave-shape elements (26 & 120; see Figs. 8, 9, 14 and 15), a tension element (50) and one connecting means (128). The concave-

shape elements have a lower leg region, a forward region (22) and a heel region (122). The heel region has a ground surface and the forward region has another ground surface (see col. 6, lines 31-37).

Claims 9 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson et al US Patent 5,116,384.

Wilson et al discloses a prosthetic foot having two elements (10 & 28; see Figs. 1 & 2), a tension element (12) and one connecting means (32). The elements have a lower leg region, a forward region (20) and a heel region (16). The heel region has a ground surface and the forward region has another ground surface (see Fig. 2). Finally the tension element has a ribbon-like element.

Allowable Subject Matter

Claims 12 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
